**M.M : 100**

**NOTE:** (i) All questions are compulsory.

(ii) Marks are given for each question against them.

**Q.1 Read the following passage carefully and answer the questions given below :-**

Malaria has been the scourge of humanity since the earliest times , and there are ominous signs that is fighting back against modern science. The first great breakthrough in the treatment of malaria was the discovery by sir Ronald Ross that the disease was transnitted by the female anopheles mosquito with the connection between malaria and the mosquito clearly ertablished , steps should be taken to fight the disease.

One method was to attack ths breeding places of ths mosquito . It was known that mosquitoes taid their eggs in water. So in malaria infected areas, work was started on draining marshes, stagnant pools, and trying to ensure generally that there were no area of water where mosquitoes could bread where areas of still water could not be drained, they were sometimes covered with Oil or detergent, which made the unus-able by the mosquitoes.

The most obvious and easiest method of prevention is to use wire screens and mosquito netting to prevent people from being bitten.

A more flexible method is to take protective drugs, Sueh as quinine. This drug was at one time very widely used. Recently there have been indications that certain varieties of malaria germs are beconing resistant to the more modern drugs , and quinine is coming into use once more.

**Questions :-**

- (i) Find out the words from the passage which have the same meaning as the words given below-
- (a) Cause of Suffering                      (b) Easily seen or understood

iii) Write the name of the poet and the poem .

(2)

(vii) Give a suitable title to the passage. (02)

**Q.2 Read the passage carefully and answer the following questions :-**

All spiders are carnivorous ( feeding mainly on the flesh of other animals ) . Spiders eat insects including other spiders. Scientists often divide Spiders into two types : web spiders and ground spiders. Web spiders produce webs to capture prey , while ground spiders hunt prey directly without using a web. Almost all spiders use poison glands to kill or paralyze their prey or to defend themselves.

Contrary to popular belief , most spider bites are not dangerous to humans of ths 40,000 species of spiders, only about 30 species produce bites that may cause illness. Spiders rarely attack humans unless they feel threatned, and if they do bite, the wound is rarely serious. There is absolutely no reason to kill any spider or to call an exterminator if you have spiders in your house. As an old English saying goes, " if you want to live and thrive, let a spider run alive ! "

**Questions :-**

- (i) Find out the words from the passage which have the same meaning as the words given below-
- (a) an animal or animals Caught, Killed and eater by another animal as food.
  - (b) make somebody temporarily unable to move
