

Q. 1 Read the following passage carefully and answers the question given below it.

The "Pench National Park" {Mogililand} is one of famous National park in the world. It is in between Nagpur and Jabalpur city. There is also the center point of India. It is on the road National Highway 07. We can reach Kanyakumari from Kashmir by this road. Park is also known as "Mogililand" because of the "Jungle by" - "Mogli" named later. The history of Seoni district and gazette says about a "miracle" which is related with the Jungle boy and the herd of dangerous wild animals. The boy was born at Chorgarthiya village now it is very near to the park in seoni district, M.P. One day when the little innocent boy of 18 months was asleeping outside of the hut, her mother left him and went to her fields. The herd of animals came there and lifted the innocent for their dinner. With the help of history and gazette of Seoni and friends to "Rudyard Kupling", an Australian novel writer, wrote the famous "Jungle book" novel its main script based on Mogle's true life.

Mogli the hero of the famous Jungle book grew up among dangerous herd of animals. He ate, ran, jumped, made sounds and helped them with human skills. We have seen in a Television serial in 1989. History says he lived with animals round about 24 years. We know very well that human has great affection to several animals but it is "one and only "miracle" in the modern world" that animal brought up a human". Why they give time to grow up? Why did they not eat the boy? It is wonderful. So Pench National Park called the Mogililand because he passed his life and acted like animal in the area. MP's Ex. Forest Minister, Lt. Harbansh singh who was very devoted to the children of schools and education, worked a lot for Mogililand and started a programme named 'Mogli Utsav' for school students of M.P. in 2002 "Save animals life"

Q.2 Read the following passage and answer The question given below it.

Pollution is the fouling of the environment, land water and air by waste, smoke, chemicals and other harmful substances. The most serious pollution occurs where there are large cities and many factories. As factories produce new goods for people to buy old ones are thrown out with household rubbish. Burning the refuse pollutes the air, dumping it in rivers and seas pollute the water and rubbish tips are unpleasant sights and take up much needed space. Getting rid of plastics is particularly difficult. Wood and paper decay after some time but plastics never decay. The world's oceans have been used as dustbins with millions of tones of rubbish being dumped into the sea every year harming marine life. If too much untreated sewage is poured into the seas, lakes and rivers from sewers, the water can no longer dilute it. All the oxygen in the water is used up and the fish die.

Smoke from factories, chimneys and exhausts, gases from motor vehicles pollute the air. Chemicals in the air combine with moisture to make acids which eat away stone and brick and so damage buildings. Carbon monoxide gas and other substances given out by the engines of cars and buses can damage people's health. Ridding out world of pollution is an unimaginably big task.
