

INFORMATIC PRACTICES - 2013

Time : 3 Hours |

Class : 12th

| M. M. : 75

Instructions-

- (i) All questions are compulsory.
- (ii) Marks allotted to each question are given against it.
- (iii) Internal choices are given in Question Nos. 5 to 15 each.

Q. 1. Choose the correct alternative and write in your answer book:

- (A) Data models are used for:
 - (i) Software (ii) Database
 - (iii) Program (iv) Schema
- (B) Extension of Activex control is:
 - (i) OLE (ii) OCX
 - (iii) DLL (iv) VBP
- (C) Disjunction operator is:
 - (i) OR (ii) AND
 - (iii) NOT (iv) XOR
- (D) TCP protocol belongs to which layer of model?
 - (i) Application (ii) Transport
 - (iii) Network (iv) Data link
- (E) A Special type of FOR Loop in PL/SQL is:
 - (i) PROCEDURE-FOR (ii) FUNCTION-FOR
 - (iii) CURSOR-FOR (iv) FOR-LOOP

Q. 2. Fill in the blanks of the following:

- (i) Graphics is the part of system.
- (ii) References are the libraries.
- (iii) DSN is required for method.
- (iv) PL/SQL is based on programming language.
- (v) In distributed database same software is used for each database.

- Q. 3.** State True/False:
- (i) DROP command is used to drop a column.
 - (ii) OLEDB is a thin middle layer.
 - (iii) Command object executes single query.
 - (iv) Replication and fragmentation are same processes.
 - (v) ELSIF can be replaced by CASE statement.
- Q. 4.** Match the Column 'A' with Column 'B' by choosing correct answers from Column 'B': <http://www.mpboardonline.com>
- | 'A' | 'B' |
|--------------------------|--------------------|
| (i) TABLES | (a) Large object |
| (ii) DIM | (b) Bind variables |
| (iii) ADO Data Control | (c) Back-End |
| (iv) SELF JOIN | (d) Components |
| (v) Non PL/SQL variables | (e) Variable |
| | (f) Single table |
- Q. 5.** Explain different VB data types. **(Or)**
Explain any four numeric functions with syntax and example.
- Q. 6.** Explain all Data Control methods. **(Or)**
Explain ADO connection object with syntax.
- Q. 7.** What are subroutines? Explain with an example. **(Or)**
Explain the MsgBox function with syntax.
- Q. 8.** Explain CREATE TABLE with syntax and example in PL/SQL. **(Or)**
Differentiate CHAR and VARCHAR 2 in PL/SQL.
- Q. 9.** Explain the following:
(i) Data Dictionary
(ii) Data Warehouse. **(Or)**
Explain DML statements with an example.

- Q. 10. Explain with reference to VB projects properties, Components, references and Data Environment. (Or)
- Write IF-THEN statement and compact IF-ELSE statement with syntax in VB.
- Q. 11. Explain Err Object and its properties. (Or)
- Explain different data report designer controls in VB.
- Q. 12. What is Attribute? Explain various types of attributes. (Or)
- Explain Hierarchical model and Network model.
- Q. 13. Define SQL cursor and explain the important attributes of cursor. (Or)
- Explain CASE statement with syntax and example in PL/SQL.
- Q. 14. Write down the syntax and example for creating stored procedure in PL/SQL. (Or)
- Explain distributed database and its types.
- Q. 15. Explain different attributes of Explicit cursor. (Or)
- Explain the complete syntax of Trigger.
