

People as Resource

Date: / /

⇒ Overview :

- Population as an asset for the economy rather than a liability.
- Human resource is further developed by becoming more educated and healthy, we call it 'human capital formation'.

⇒ Economic Activities by Men and Women :

- Economic activities are developed purpose activities and wealth producing activities. It creates economic and financial gain by producing goods and services and adds value to the national Income.

⇒ Sectors Under Economic activities :

- (i) Primary Sector.
- (ii) Secondary Sector.
- (iii) Tertiary Sector.

(a) Primary Sector :

- Primary Sector known as agriculture Sector.
- Primary sector consider directly using natural Resources.
- Primary Sector include activities like Forestry, animal husbandry, Fishing, poultry, Farming, mining and quarrying.

(b) Secondary Sector:

- Secondary Sector is known as manufacturing sector.
- This sector consider manufacturing of goods.

(c) Tertiary Sector:

- Tertiary Sector is largest contributer in GDP of India 74% +.
- Tertiary Sector is also considered service sector.
- This Sector include all type of services like banking, education etc.

⇒ Two parts of Economic activities:

- Market activities
- Non-market activities.

(a) Market activities:

Market activities consider production of goods or services including government services for Remuneration.

(b) Non-market activities:

- Activities which are not done for commercial purpose and done for self consumption.
- Also Known As Subsistence Farming.

⇒ Work Performed under Economic activities

- There are huge difference between economic activity performed by men and economic activity performed by women.
- Women look after domestic affairs like cooking of food, washing of clothes, cleaning of utensils etc.
- Men are paid for their work on the contrary women are not paid for their performance in the house.
- The work done by men is recognized in the National Income whereas the household work done by women is not recognized in the National Income.

⇒ Quality of population:

Quality of population is mainly in literacy, Rat, Infant mortality rate, health of population. Literate, young and healthy population is a Asset of a country.

(i) Education:

- Education is the process of learning for acquisition of knowledge. It is an important input for growth of a person.

- Development of a country is basically depended on literacy rate. When a person is educated then a family can be educated. After that society can be educated and hence literacy rate of the country can increase.
- An educated person can earn more income compared than an uneducated person because of their skill. For this term, National Income of a country can increase.
- Governance efficiency can also be enhanced through learning process.

(iii) Health:

- An unhealthy person is burden for a country in terms of economics. A healthy mind creates healthy environment. For development of a country, healthy environment is compulsory.
- In India, states like Bihar and Uttar Pradesh have few medical colleges. These states have poor health conditions.
- On the other hand, four states Karnataka, Andhra Pradesh, Tamil Nadu and Maharashtra have majority in number of medical colleges with 81 medical college out of 181.

Www.YOUTUBE.COM/NCERTPOINT Date: 1/2/19

- In India, infant mortality rate has come down from 147 in 1951 to 34 in 2016.
- Crude birth rates have dropped to 20.4 and death rates to 6.4 in 2016.
- Crude birth rate is the number of living birth occurring in a given geographical area per 1000.

⇒ Unemployment:

- Unemployment is a phenomenon that occurs when a person wants to do work but unable to find work. (Involuntary employment)
- Unemployment is liability to the nation. It leads to wastage of manpower resources.

TWO type of unemployment Found in rural areas

- (i) Seasonal unemployment
- (ii) Disguised unemployment.

(a) Seasonal unemployment:

- In case of Seasonal unemployment people are not able to find jobs during some month of the year.

- Generally, in agriculture sector this kind of problem is visible. In agriculture sector, some seasonal foodgrains are produced. So the farmers are employed only in that particular season.

(ii) Disguised unemployment:

- Disguised unemployment happens when people seems to be employed, but in reality unemployed.
- For example: in agriculture sector the field requires 2 person but 4 are working in it. So it shows the 2 person are extra there and it seems they are employed but actually they are unemployed.

⇒ Urban areas unemployment:

- In urban areas educated unemployment are seen. This problem occurs when an educated person is willing to work but he/she unable to find work (Involuntary unemployment).
- Number of graduated and post-graduated unemployed has increased faster than matriculates unemployed.

\Rightarrow Infant mortality rate (IMR): Infant mortality rate is the death of a child who is come under one year of age. It is measured by number of death of children under one year of age per 1000 live birth.
